ABOUT ME

Engineering student at ENSA Tétouan, I combine technical expertise ranging from **low-level** (VHDL, Assembly) to **Web Development**. Certified **eCPPT** and active in the **CTF** scene, I complement my profile with **Freelance Project Management** experience. Combining **leadership** and autonomy, I can lead teams and deliver complex technical projects.

EDUCATION

Cybersecurity & Embedded Systems Engineering
ENSA Tétouan, Morocco — *Ongoing*

Baccalaureate in Physical Sciences
High Honors (Mention Très Bien) — *2022*

CERTIFICATIONS

eCPPT - Certified Professional Penetration Tester
INE Security — *Oct - 2025* — Credential

Google Cybersecurity Professional Certificate V2
Coursera / Google — *Apr - 2025* — Credential

eWAPT - Web App Penetration Tester
INE Security — *Ongoing*

eWPTX - Web App Penetration Tester eXtreme
INE Security — *Ongoing*

SPECIALIZED TRAINING

- **Google Cybersecurity Professional** (Coursera)
- **eJPT** (INE Security)
- **eCPPT** (INE Security)
- **SLAE-32** & **SLAE-64** (Pentester Academy)
- **Linux Exploit Development Professional** (INE)
- **AD Enumeration & Attacks** (HTB)

SKILLS

Programming Languages
Java | Python | C/C++ | PHP | JS/HTML | VHDL | Verilog | SQL | Assembly (intel x86, intel x86-64, DSP, AVR)

Offensive Security
Pentesting | Exploit Development | Active Directory

Soft Skills
Project Management | Leadership | Teamwork | Communication

LANGUAGES

Arabic: Native
English: B2
French: B2
Spanish: A1

PROFESSIONAL EXPERIENCE

Cybersecurity Intern — *Nov 2025 – Jan 2026*
Deltaware Solutions (Remote)
- Hands-on training: Web Security, OSINT, Phishing, and Active Directory.
- Attack simulations on pre-configured corporate environments.
- Vulnerability report writing and recommendations.

Project Manager (Freelance) — *Ongoing*
- Design of an e-learning platform 100% tailored to the Moroccan education system.
- Key features: Teacher space (course import) and advanced student progress tracking.
- Responsibilities: Client communication, requirements analysis, planning, and development team coordination.

ACADEMIC PROJECTS

Smart Parking - IoT & Full Stack Platform
- Complete smart parking management system.
- **Embedded & Security:** Physical access control via RFID cards and vehicle detection (IR Sensors, Servo).
- **Web & Network:** Real-time communication (HTTP/WiFi) between microcontrollers and a centralized supervision dashboard.
- Stack: ESP32/C++, PHP/MySQL, JS, Networking, RFID

Custom Shellcode - Exploit Development
- Development of portable payloads (Bind/Reverse Shell) for 64-bit Linux systems.
- Stack: Assembly x86-64

UART Controller for FPGA
- Design of a synthesizable UART transceiver for FPGA implementation.
- Stack: VHDL, ModelSim

LetsShare - P2P File Transfer
- Desktop application for secure file transfer on local networks (LAN).
- Stack: Java, TCP Sockets, Swing

EXTRACURRICULAR ACTIVITIES

North Hacking Day
- Participant in the CTF organized by ENSA Tétouan ENSA Tanger.
- Solved 3/3 challenges in the Binary Exploitation category.

Speaker - "Roadmap" Event
- Event aimed at introducing 1st-year students to cybersecurity.
- Presented the major cybersecurity certifications roadmap.

CTF Organizer - CyberGuardians — *Ongoing*
- Organizing the 2nd edition of North Hacking Day.
- Author of challenges for the "Binary Exploitation" category.
- Member of the logistics committee (operational management).

Football Tournament - Sport Club
- Vice-Champion (2nd place) of the competition.
